The Senate then repaired to the Representative chamber, where his Excellency the Governor delivered to both houses of the General Assembly the following message in writing :

*To the Senate and  
House of Representatives.*

To afford with certainty the time which may be requisite, to enable the General Assembly to make the necessary arrangements to meet the demands against the state, arising on the loans from the Vincennes Bank, induced the request for your meeting at an earlier period than usual. Twenty thousand dollars of the public debt becomes due within a limited period, together with interest on the whole debt for the present year. It is believed, that an amount competent to meet this demand, will be realized at the Treasury in the notes of the state Bank and branches ; and it will be for the representatives of the people to determine, whether the present demand upon the public faith of the state, can not be discharged in equity and good conscience, with the notes of the bank and its branches in whose favor the obligations were executed. It will be oppressive, if the state, after the paper of this institution was authorised to be collected in revenue, should be prevented by any assignment of the evidences of the existing debt, from discharging at least so much of that debt with the paper of the bank, as will absorb the collections of the present year ; especially, when their notes after being made receivable by the agents of the state, became greatly depreciated by great mismanagement on the part of the bank itself. It ought not to be expected that a public loss to the state should be avoided, by resorting to any measures which would not comport with correct views of public justice ; nor should it be anticipated that the treasury of the United States, would ultimately adopt measures to secure an uncertain debt, which would interfere with arrangements calculated to adjust the demand against the state, without producing any additional embarrassment. If an assignment has been made of the bonds executed in behalf of the state, and those bonds had become due, it would have presented a very different view of the subject. The description of funds, in which the revenue of the present year, as well as arrearages of past years, was chiefly collected and collecting when the assignment is said to have been made, was well known to those who may have

authorised the measure; and it is presumed that the treasury department or its agent would have become acquainted with the laws of the state on this subject, before such assignment would have been negotiated. At the time when the assignments are said to have been executed, the public agents of the state must have collected much the greater portion of the annual revenue as well as outstanding debts, in the paper of the bank; and the revenue laws are such as to require at least for state purposes, a continuation of the public collections in like funds, until different provisions shall be enacted by the legislature. A tender of those notes in a legal manner, to the bank at which payment has been promised, is respectfully recommended.

In conformity to a joint resolution adopted by the last General Assembly, an examination has been made into the situation of the state bank and branches, the details of which will attend a subsequent communication.

It is believed, that the credit of the bank paper of this state might have been sustained, so far at least, as to have secured the holders from serious loss by depreciation, had the bank been prudently managed, and the notes gradually withdrawn from circulation; as it will be acknowledged, that the greater the credit that would have given to it, had different measures been pursued by those to whom its chief management has been entrusted: so much the less would have been the public and private injury that has been experienced. Whatever disposition the principal bank may have made of the funds deposited by the United States, it must be admitted, that the connexion of interest between the Steam Mill Company and the bank, and the extraordinary accommodations, on account of the manner in which they were obtained, as well as their amount, effected by arrangements of the Steam Mill Agency and some of the officers of the bank, have been among the principal causes which have prostrated the paper circulating medium of this state, so far as it was dependent on the state bank and branches. And from the direction which for a time past has been given to the funds as well as to the credit of the state bank, it would

seem as if it had been an object, to produce a depreciation of her own credit as well as that of her branches; producing thereby among other mischievous consequences, the means of direct gain to a certain portion of the community, equal to the loss which the innocent and disinterested holder of the paper inevitably sustains.

The causes which have produced the pecuniary distress with which we are embarrassed, remain almost unchanged, except the relief afforded by the act of Congress to the purchasers of public lands. All relief measures within the control of the state authority, should be considered as temporary, and be discontinued so soon as the causes which produced them shall have been so far removed as to justify a recurrence to former regulations in relation to contracts. A period should be prescribed by law, and all contracts of a subsequent date be subjected to such legal provisions as have heretofore been usual. The want of a discrimination of this character in relation to past and future contracts, presents inducements to add to pre-existing debts, while a return to former habits of industry and economy is thereby retarded. To encourage by precept and example, the use of articles of domestic manufacture, and the introduction into families of manufacturing machinery, will prove efficient auxiliaries in removing our pecuniary difficulties, and have a tendency to secure our future independence from those sudden and extraordinary changes produced by the fluctuations of commerce, so injurious in their effects upon the moral and political happiness of nations and individuals. Different measures have been resorted to by the legislatures of different states, with a view to relieve the embarrassment of the people.—Individually acquainted as the representatives are, with the operation of the system of relief adopted in this state, as also with the particular interests and situations of their constituents, they will be fully competent in the discharge of their important duties, to adjust those interests, by the adoption of measures that may contribute to the lasting advantage of our fellow citizens. The propriety, however, of authorising creditors, under proper provisions, to require additional security on replevin bonds, is submitted to your consideration, inasmuch as the ostensible property of individuals may be

subject to prior liens. It cannot be intended that a judgment creditor is to be subjected to greater uncertainty in the ultimate collection of a legal demand, by affording to the debtor the mild means of satisfying his creditor, without sustaining a greater sacrifice than may be rendered ultimately unavoidable. Governments like individuals are imitative, and often follow without sufficient inquiry the measures which others have adopted. Many of the western states particularly, have experienced essential injury from extravagant emissions of bank paper; and notwithstanding its great depreciation, necessity or usage seems to have been sufficiently powerful to induce as a measure of relief, new emissions to supply a want of metallic medium; although the notes upon being introduced into commercial transactions have been subjected to great discounts upon their nominal value, and liable to much uncertainty in the rates of their exchange. In the general loss which has attended paper credit, the people of this state have suffered sufficiently to induce an avoidance of further experiments in banking, however specious the plan of its details, especially if they cannot be based upon specie capital.

The treasury notes authorised to be executed by an act of the last General Assembly, have been emitted from the treasury as the demands upon the state required; and of the means within the controul of the Legislature, to meet the expenditures of the ensuing year, a similar measure, limited by a certain amount, is deemed the most eligible. Such policy however will necessarily require for the future, that the revenue be collected in specie, its equivalent, or in treasury notes. Ten thousand dollars, of the denomination of one dollar each, with a re-issue of those executed, redeemable in specie or its equivalent at the expiration of one year from the date of such issue, will be adequate to meet the demands upon the treasury.

The revenue, annually to be realized, should at least equal the annual expenditures of the government, as also the interest of any portion of the public debt which may remain unliquidated; and the additional quantity of land, which must annually hereafter become subject to taxation after the

first day of December next, should be regarded, as a certain means of extinguishing the public debt.

The views of the General Assembly, in selecting individuals to draft a system, by which the resources appropriated to the purposes of education should hereafter be employed, may not for the present be entirely realized. The welfare of the state must greatly depend on the relative perfection, which shall characterise the plan, by which our future exertions are to be directed in promoting education, "ascending in regular gradation from township schools to a State University." Much labour and attention will be indispensable, to the accomplishment of an object so highly important and desirable; and every error, which shall influence our attempts on this subject, may be productive of evils not easily to be surmounted.

The construction and connexion of many of the statute laws have become so obscure, that a revision is considered important. The want of reasonable certainty of what is the law, in the discharge of relative duties whether of a public or private character, should be regarded as a public injury; while every generous effort should be exerted to render explicit the municipal regulations, by which our relative rights and wrongs are to be determined.

The increasing strength of the militia requires the publication of an additional number of copies of the act, regulating the duties required of this portion of our national defence. Resignations of militia officers have become so frequent, that no inconsiderable, though unfavourable effects are produced upon the progressive improvement in military discipline, and require, that some additional restraint be imposed in relation to such resignations, upon those who shall accept commissions. That some adequate means should be provided to secure the proper care and safe keeping of the public arms, which have been, or may hereafter be furnished, is obvious, and the squandering of those arms, which have heretofore been exhibited, should for the future be prevented. The duties which devolve upon the Adjutant General are increasing and have been much increased, and the propriety of an additional allowance to that which is at present afforded, is presented for your consideration.

Further legislative provisions will be necessary, to carry into operation, the humane purposes of the Legislature connected with

the establishment of the penitentiary ; and the situation of those, who have been engaged in erecting the building, are entitled to legislative attention.

The reclamation of John Dahmen, a fugitive from the justice of this State, who fled to the confines of Upper Canada, necessarily produced an unexpected claim upon the contingent fund. With those who were engaged in his recaption, the stipulation on my part was to defray their necessary expenses, and present their services to the consideration of the General Assembly for compensation. Those services, on account of several considerations, were certainly meritorious and attended with considerable fatigue and exposure.

The request which has convened you for the discharge of your public duties, was not determined on, without reflecting upon the personal inconvenience which might be experienced by some of the members of the General Assembly. The period of your meeting, however, will not add to the public expenditures; though the time afforded thereby may be found necessary, to prevent a serious public loss, and to avoid a corresponding responsibility which would otherwise be its attendant.

The peculiar and interesting situation of the State, will require much precaution and patriotic exertion, on the part of those particularly, to whom its legislative functions have been confided, to resuscitate its financial concerns, and provide for the present and future demands, in such manner as the public faith of the state imperiously requires. Local jealousies and partialities should be avoided, and the public concerns regulated and directed, by the first principles upon which our political fabric has been erected: uniting our common exertions, to effect the great objects for which delegated authorities have been constituted.

With the confidence which has been reposed by our fellow citizens, in the beneficial results to be realized from your deliberations, allow me to unite, imploring the assistance of that Power, without whose co-operation every other will be unavailing.

JONATHAN JENNINGS.

*Mr. President—*

And he withdrew.

Which said communications in writing were read and are as follows viz :

*To the Senate and*

*House of Representatives.*

I submit for the consideration of the General Assembly copies of the representation of the board of managers of the Jeffersonville prison.

JONATHAN JENNINGS.

On motion,

*Ordered*, That the same be referred to the committee of ways and means with the accompanying documents to consider and report thereon.

*To the Senate and*

*House of Representatives.*

If the bonds executed to the Vincennes bank shall have been assigned for the use of the treasury of the United States, the offer of payment which has been required to be made will not it is presumed be accepted, on account of the funds with which the tender of payment will be made, although in the notes of the bank and her branches. Should such a circumstance take place, I have deemed it my duty respectfully to submit to the General Assembly the propriety of making a demand of payment at the branch bank or agencies where their notes are respectively made payable; and upon payment being refused to present them again at the principal bank, with a view to render the claim on the part of the state to a setoff as strong and unexceptionable as it is in her power to render it.

If such a course be not adopted it is believed that the situation of the state in relation to any supposed assignment of these bonds will be left upon doubtful grounds, while if pursued the state will occupy the strongest ground at all, by having done necessary and avoiding the possibility of subjecting the state to a charge of neglect on her part.

This position is not inconsistent with a pacific and respectful deportment towards the general government, while if the case shall hereafter become a subject of future negotiation, it will be left unshackled with preliminary disquisitions and stand as it should do upon the law and equity which may arise out of the transaction itself. It will in such case be only necessary for the state to shew what has been done upon her part, instead of being subjected by adopting a different course to the uncertainty of proving what the principal bank and its branches may have done.

In a case of so much importance, prudential measures are calculated to shield the state from responsibility that may otherwise accrue, while the additional expenditure which would be requisite, will be only nominal in its amount.

Respectfully,

JONATHAN JENNINGS.

That upon the eighth day of this month he did, within the banking house of the bank of Vincennes adopted as the state bank of Indiana, and within the usual banking hours, in the presence of the cashier thereof, count down the amount of the first bond, being ten thousand dollars, which has been executed for the loan due from the state to that institution, composed partly of the notes of the said bank, and the residue of notes upon her branches, all of which he the said cashier peremptorily refused to receive, having remarked, that he could do nothing towards the adjustment of the business, as this bond together with all the other bonds for loans made to the state by the institution, had never been in his possession, and which he had been informed, were assigned over in discharge of a debt due to the general government, previous to his coming into office.

Mr. President—

Your committee to whom was referred the communication of his Excellency the governor, together with a letter of official endorsement from the Secretary of the United States, in relation to a demand made by the executive of this state, of the executive of the state of Kentucky, for the delivery of certain fugitives from the justice of this state; have had the subject under consideration, and submit the following report:

Your committee find from an investigation of the subject referred to them, that certain individuals resident of the state of Kentucky, were indicted in the Harrison Circuit court for a breach of a penal law of the state of Louisiana. That the Executive of this state repeatedly and in a legal manner called upon the Executive of Kentucky for a surrender of those persons to the justice of this state. That a very much delay and equivocation on the part of the executive of Kentucky, the subject was submitted by him to the legislature of that state, who after a laborious report refused to surrender the persons thus demanded.

Upon what principle of law or morality the refusal of the legislature of Kentucky, may have been grounded, your

committee will not at this time undertake to investigate concerning the subject fully, as indicated by a report of a joint committee on the same subject, submitted and agreed to at the last session of the General Assembly of this state, in which report the Executive was requested to lay the same before the President of the United States, requesting the general government to interpose her authority to render to this state that justice, which has been denied on the part of Kentucky.

Your committee find from a further investigation, that the Executive of this state has promptly complied with the requisitions enjoined upon him by said report, and now here to regret, that a subject of such vital importance to the character and dignity of the state, has not been answered by the President of the United States as appears from the documents before your committee.

Your committee conclude by recommending the adoption of the following resolution, viz:

Resolved, That the chief Executive of this state be and he is hereby requested to renew his application to the President of the United States, in relation to the foregoing subject. All which is respectfully submitted.

# A REPORT,

## OF THE COMMITTEE ON EDUCATION.

THURSDAY MORNING, Dec- 6, 1821.

Messrs. Caswell, Todd and Welsh, from the committee appointed by the last General Assembly, to prepare a bill, providing for a regular system of education, now made the following report:

The committee appointed by a joint resolution of both Houses of the General Assembly of the state of Indiana, to draft and report, at the present session, "A bill providing for a general system of Education, ascending in a regular gradation, from Township Schools to a State Seminary, wherein tuition shall be gratis, and equally open to all; respectfully beg leave to report, that they have had the subject under consideration—and fully reciprocating the sentiments expressed by the General Assembly, as to the importance of a general diffusion of learning and knowledge among the rising generation, particularly in a government, which, like ours, is bottomed upon *public opinion*, and where intelligence and virtue are the strong safeguards of the Republic; have given it all the attention which time and their various avocations would permit.

Your Committee have to request, that owing to the sickness and death of part of their number, and the non-attendance of others, they have not

only been deprived of the benefits anticipated from the well known talents and learning of those with whom they had the honor to be associated; but those circumstances have put it out of the power of your Committee sooner to convene, that a greater portion of time, since the last session of the General Assembly, might have been devoted to the important duties enjoined upon them by the resolution. Although by the resolution of your honorable body, your committee were only instructed to report a bill providing for a general system of education, yet they have deemed the subject of sufficient importance to justify a brief report, shewing the grounds of calculation upon which, a bill when reported, may eventually rest.

The donations made by the Congress of the United States, for the benefit of Schools and a State University (although not without a consideration given on the part of the state, by a relinquishment of the right of taxation for a limited time) are liberal in the extreme; and the Union collectively, although they cannot control, have an indirect interest in their final appropriation. It is believed by your committee, that if a proper disposition be made of those donations, a permanent fund may be created, sufficient in amount not only to disseminate the general and more necessary branches of education in the several townships, but also to furnish such endowments to an university, as with some assistance will enable this state to occupy, in a literary point of view, a highly respectable standing. But this, in the opinion of your committee, cannot be expected immediately. High attainments in literature, are not the results of a moment; but like all other improve-

ments, must be gradual and progressive. Your committee are deeply impressed with the importance of the *first step* which may be taken towards the accomplishment of the grand design. Should a hasty and improvident disposition be made of those funds, your committee are well aware, that the error may be fatal; and that the grants of the General Government, so beneficial in their object and so liberal in their amount, will be rendered unavailing; thereby destroying the brightest prospects, not only of the present generation, but those which are to come after us. Under this view of the subject, your committee cannot but feel, that they are travelling over consecrated ground; and they do not mean it as a common place remark, when they say that it is with diffidence they suggest a course of measures, which, if finally adopted by the Legislature, must be pregnant with such important consequences.

Your committee have been induced to lay before the General Assembly, the result of their deliberations, so far as they have progressed, that the committee on the subject of education, may be as early as possible in possession of the facts and calculations upon which they may be called to report, and which shew the foundation of the systems which have heretofore been adopted by older states.

The state of Indiana is estimated by your committee, to contain twenty two millions three hundred and twelve thousand nine hundred and sixty acres, including land and water.

## IV

From this amount, your committee have made the following deductions:

For that part of the state covered by the waters of Lake Michigan,	acres. 96,000
For those lands embraced by Clark's rant,	149,000
For Reservation in Knox and other counties,	30,420
For lands reserved for the use of the university,	46,080

Total amount of deduction, 417,500

Amount of the whole area, 22,312,960

Amount of deduction, 417,500

21,895,460

From which aggregate amount, one thirty-sixth part is to be taken as lands appropriated for the use of schools, amounting to six hundred and eight thousand two hundred and seven acres.

These lands, or part of them, your committee would recommend, should be put in market as soon as practicable; and the situation of the country will justify the measure.

The following table will show what may be realized by such sale, at the relative prices of one dollar and twenty-five cents to five dollars per acre, provided the whole amount should be put in market, and can be sold;

## V

Amount of sales at \$1.25	\$ 760,258 90
Do. at 1.50	912,310
Do. at 1.75	1,064,362
Do. at 2.00	1,216,444
Do. at 2.25	1,368,465
Do. at 2.50	1,520,517
Do. at 2.75	1,672,569
Do. at 3.00	1,824,621
Do. at 3.25	1,976,672
Do. at 3.50	2,128,724
Do. at 3.75	2,280,776
Do. at 4.00	2,432,828
Do. at 4.25	2,584,879
Do. at 4.50	2,736,931
Do. at 4.75	2,888,983
Do. at 5.00	3,041,035

For the purpose of facilitating the sale of the aforesaid lands, your committee would recommend the establishment of one or more Land Offices, at the discretion of the General Assembly, to be placed at such points as they may think most advantageous,

Whether these lands shall be sold for cash in hand, or upon credit, payable by instalments, your committee find some difficulty in determining.—In favor of a sale for cash in hand, it may be urged, that if the proceeds of the sales are funded, together with the interest at the expiration of each year, that the accumulation will be greater than can be realized from the extra price for which it is supposed the lands will sell, should a credit be allowed. Your committee, however, are inclined to think, that considering the present embarrassed state of the circulating medium of

the country, the scarcity of the precious metals, and the great amount of land now in market, that greater inducements will be held out to purchasers, should the lands be sold on a credit of four years, payable by instalments, according to the system heretofore adopted by the United States; and that the lands will command a price of more than sufficient to balance such accumulation.— But whether the accumulation of a debt existing between the government and the people, and the consequent forfeitures which may be expected to follow such credits, are considerations sufficient to overbalance the difference in price, your committee will not attempt to determine. Should the lands be sold for prompt payment, and the proceeds, together with the annual interest, be put upon loan, the fund will rapidly encrease in amount, and the yearly dividends will consequently be greater.

The following table will shew the ratio of increase, from one to ten years, from the different prices, from one dollar and twenty-five cents to five dollars per acre.

This table, together with the other, may probably contain some errors, and in no instance have the fractional parts of a dollar been calculated; but they are supposed to be sufficiently correct to answer all the purposes for which they are intended.

Should the Legislature be disposed to fund the proceeds of the sales, it is believed by your committee, that at the expiration of six years, a sufficient dividend may be made to maintain a school in each school district, for the term of 3 months in each year, out of the public money alone.

Your committee are also of opinion, that a school for a shorter term than three months in each year, would not be calculated to promote the intended object, and that good teachers cannot be obtained without great difficulty, for a shorter term. To effect this object, your committee would recommend that so soon as any money shall be received upon such sales, or upon instalments which may become due from time to time, that the amount be loaned upon mortgages of real estate, in small sums, the interest to be paid annually, which interest also be funded in like manner, at the expiration of each year, having special regard that the debt be perfectly secured, upon such landed estates as have an undoubted title, the amount of which shall be sufficient to secure the state against all possible losses. But should the dividends be immediately made after the first year, without further increase, the following table will shew the number of townships in which schools are eventually to be organized, the number of

# VIII

schools necessary, allowing nine square miles to each school district, the amount of dividend for the first year, at the relative prices; also the amount which may be divided, should the fund be permitted to accumulate for the term of six years.

It is impossible for your committee to determine the amount of money which may be raised by selling the lands upon credit and funding the instalments, as they become due; but it is presumed the amount will be less than upon a cash sale. The above calculations are made upon the supposition of a sale of the whole of the lands; but as the proportion of school lands is the same throughout the state; the dividend in each township will be the same, although no sales should be effected, but in a more settled part of the country.

In determining the number of schools which may be necessary throughout the state, your committee have allowed nine square miles to each district, which will give to each township four district schools.

If these are properly located, the extreme distance which any children will have to travel to attend school, will be but little more than one mile and one half. This calculation, it is presumed, will suit the present population of this state; but in the state of New-York, the law provides for the establishment of a school upon every four square miles, and if we allow to every quarter section of land, four children, between the ages of four and sixteen years, the number would be sixty-four in every school district; a number sufficiently large, in the opinion of your committee, for advantageous improvement. Upon that calculation, nine school districts, instead of four, would be necessary in each township, which will consequently increase the number from three thousand eight hundred to eight thousand five hundred and fifty. It is the opinion of your committee, that the present population will not require a greater

number than four, and the change can be made whenever the situation of the country shall require it. Your committee would therefore recommend, that a school district be located and established upon every territory of land comprising nine square miles, whenever the population in such township and the situation of the school funds will justify it; the location to be made as nearly central within the district as may be.

Another system of rendering donation lands productive, has been adopted in many parts of the United States, which is that of leasing the lands, either permanently, or for a life or lives. But the same beneficial results have not been here as in Europe.

In England all lands are held by that kind of tenure, and the immense population of that country are not left to their choice of titles. The privileges attendant upon a fee simple interest, are not within the reach even of the wealthy; and although the existence of the people in a great measure depends upon a preservation of the timber and a proper cultivation of the soil, yet even there, the restrictions and forfeitures attendant upon those estates, are often considered burdensome and oppressive. If the sole object of the farmer were the accumulation of wealth, it will not be denied by your committee, that leases would be preferred; for it is believed that the individual who pays during his life the annual interest of five dollars per acre, by way of ground rent, pays a less sum than the purchaser, who advances his purchase money, although he should buy the land at a much less price than five dollars per acre. But the independence attached to a fee simple

ple interest, it is hoped, will long be cherished by every freeman, as one of his dearest rights.

It is believed, by your committee, that the great mass of individuals, who would make good tenants, will prefer the allodium, and they cannot but be strongly impressed with a belief, that even permanent leases will not protect the property of the state from destruction, unless restrictions are imposed upon tenants, which might be considered incompatible with the principles of a free government. Should restrictions be imposed, much danger is to be apprehended in progress of time, from litigation and disputes, which may arise between the government and the people, should the system of leasing be adopted. If the tenants hold the lands without impeachment of waste, the experience of our sister states furnishes ground of fear, that after a few years, those tenants will find it convenient to quit the premises, not only leaving rent in arrear, but doing such damage to the lands, as will place it beyond the power of the state, either to sell or lease them for many years. This system of leasing is also more objectionable here than in many of the eastern and northern states.

In most parts of that country, the second growth of timber is more thrifty than the first, and lands which were cleared of timber in the year eighteen hundred, have now a sufficient growth upon them to answer all the common purposes of life. But your committee would enquire, whether the experience of this country as to the second growth of timber, will justify such an expectation, as it regards the greater portion of lands in this state.

As an answer to these objections, it may be urged, that the tide of emigration is steadily flowing

so the west, and that the future population of the state will justify the expectation, that tenants of a better class will soon be numerous. Put it must be recollected, that the field for emigration is also immense, and that the tide will probably continue to roll on over the western wilds, until it reaches the Pacific Ocean: so that little change can be expected, until the long distant ebb shall return upon us a redundant population.

Your committee are however apprised, that many of your honorable body entertain different sentiments, as to the best method of rendering the school funds productive and have therefore prepared a table, shewing what amount may probably be realized, by selling the lands at auction to the highest bidder, the purchaser paying annually, the interest of the amount he shall bid for the land, also shewing the increase of that fund by a loan of the amount of interest, from year to year, for the term of six years.

Suppose the lands to be sold at \$3 50 per acre, the purchaser paying annually the interest of the amount of sale, the yearly amount to be paid for a quarter section would be twenty one cents per acre, which is equal to, \$36 60

Making for the whole, the gross sum of 127,720 00

If this sum together with the interest and the instalments, as they become due, from year to year, be funded for the term of six years; the whole amount will be 1,018,630 00

Interest of this sum one year is \$53,454

Annual sum to be added as income, 127,723

\$181,177

Making the sum, annually to be divided, 181,177 00

Amount of dividends, for each school, will be 47 67

Should the lands sell at 4 dollars per acre, the amount to be paid for a quarter section will be twenty four cents per acre, equal to 38 40

Making for the whole, the gross sum of 145,909 00

If this sum together with the annual interest, and the instalments as they become due, from year to year, be funded for the term of six years, the whole amount will be

1,164 508 00

The amount to be divided at the end of six years, will be

207 081 00

In order that a regular system of education may be adopted throughout this state, and that the public funds shall not be improperly appropriated; your committee would recommend, that a board of inspection be appointed, in each county wherein schools are to be established, whose duty it shall be, to examine the qualifications of all teachers, who may be offered by the trustees of the several school districts for employment, and shall give the person applying, a certificate of qualification, if they find his acquirements such as will justify such certificate, and that in no instance, the trustees of such school district be authorised to receive the dividends appropriated by law, for the payment of such teachers, unless the person by them employed, to teach such school, shall first have received such certificate. Your committee would further recommend, that it be made the duty of such inspectors, some or one of them, at least twice in each session, to visit and examine the several schools in their county, with a view of ascertaining the manner in which said schools are taught, and the improvements made in the several branches of education.

This course is suggested under a belief, that a public examination is calculated to excite vigilance in the instructors, and a spirit of emulation, among the youths under their charge.

Should strict attention be paid to the organization and improvement of township schools, they may become nurseries of teachers, for the wide extent of country yet to be settled.

Your committee would further suggest, that no person shall be considered as a competent teacher of such district school, unless he be of good moral character, and well versed in reading, writing, arithmetic, English Grammar, Geography and surveying.

Your committee have been more particular as to the qualifications of instructors, from a belief, that few persons will feel themselves able to educate their sons at the University, and your committee have considered the above qualifications as indispensable to a good English education.

The annual fund for the benefit of township schools, it is presumed, will not be more than sufficient to pay the instructors who must necessarily be employed, upon the system which has been suggested.

Towards the further accomplishments of the great object, your committee would recommend, that the qualified electors within the bounds of each school district, when organized for certain purposes, be a body politic and corporate, with power by their vote to levy and collect a sufficient tax, to erect suitable buildings for the purposes of a school, and also by their vote to levy and collect a tax sufficient to maintain a school in such district, for any portion of time in each year, which they may think proper, in aid of the general appropriation from the common fund.

Your committee are aware, that to compel the people of a district, to support a school against their will, might be considered an infringement of their natural rights, but if each school district is left at liberty to adopt or reject such tax, it cannot in the opinion of your committee, be considered either burthensome or oppressive.

As to the quality of buildings to be erected, and the time for which such schools shall be kept, they are left at liberty to determine, and of their comparative poverty or wealth, may be the sole judges.

Your committee would recommend, that the internal police and management of such schools, be intrusted (in addition to the board of inspection and instructor, as aforesaid,) to a suitable number of trustees, to be elected by the qualified electors in each district, who shall have power to employ teachers, furnish fuel and other necessities for the school, and to exercise a general superintendence over the concerns of said district.

## ON THE SUBJECT OF COUNTY SEMINARIES.

As to the monies arising from fines, forfeitures and commutations for military service, your committee beg leave to enquire, whether the laws upon those subjects may not need amendment, and would respectfully advise, that they be made as efficient as practicable, for ascertaining the correct amount, and for securing and collecting the monies annually.

The amount of these monies, either on hand or now due, your committee cannot, for want of sufficient data, with any precision conclusively state, but conjecture that the following estimates may not be far from correct:

From examinations had of the reports of agents for county seminaries, of twenty-six counties, for eighteen hundred and twenty, and including the previous years, the amount is stated at three thousand dollars, and for the year one thousand eight hundred and twenty one, from six counties, at two thousand and sixteen dollars, making an aggregate of five thousand and sixteen dollars, as now reported.

Your committee, however, feel pretty confident that, upon a more full and careful investigation of the subject, there will be found due to the state, a much larger sum.

With regard to the establishment of county academies, your committee beg leave to enquire, whether the following plan may not be expedient, viz. That your Honorable body should, by law, make it the duty of the several townships, in each county, to elect one trustee for each township, and resident therein, to be a member of the board of such academy, whenever the county funds for that purpose, will authorise the establishment of such an institution, and that as soon as there shall have been a regular and fair return made from each township, of the persons elected in it for a trustee, certified by the clerk and judges of the election, to the clerk of said county, whose duty it shall be to record the same, and the several trustees so elected shall have taken an oath, faithfully to discharge the duties of a trustee in such county academy, such board shall then be in law and in fact a body politic and corporate, either as it respects prosecution or defence, the acquisition or disposal of property, the choice of a teacher, or any other act, calculated to

promote the interest of such academy, and corresponding with the original laws and constitution of the state of Indiana on that subject.

Your committee would, however, further recommend, that such academies should always be subject to any constitutional alterations, which the legislature may from time to time see proper to make.

Your committee further beg leave to recommend, a sale of the college lands upon the same principles heretofore suggested, as to the lands reserved for the use of township schools, and the funding the proceeds in like manner.

It is believed by your committee, that five dollars per acre, be a fair price to establish as a medium for the whole, under this view they submit the following table, which will shew the amount of lands, so far as your committee have been able to ascertain them, the amount of money which may be realized on such sale, the yearly accumulation of the fund, and the total amount at the expiration of six years. In this calculation, the interest is added to the principal, and loaned at the expiration of each year.

With regard to an University for the state, contemplated in the law making provision for the promotion of literature, and the organization of such an institution, your committee recommend the passage of a law for establishing it, to be known by the name of the *University of Indiana*, and that a board of trustees be selected with great care, and appointed by law to superintend its interest.

Your committee think, that to appoint as great a number as are found composing the eastern boards, might not be advisable, and would for different reasons which might be assigned, tend rather to embarrass and retard the operations of such an institution, than give them facility.

Your committee would respectfully suggest the number of thirteen, besides the Governor and Lieut. Governor, who shall be trustees *ex officio*, a majority of whom having regularly met any time, shall form and be a quorum, for business; and that this board, constituted a body corporate and politic, should afterwards have authority to fill their own vacancies whenever they occur. That it should be the duty of this board, to appoint and manage all the interests of the institution, to select and employ a President, professors, tutors, a Librarian, Steward, &c.

Should the funds not be considerably increased, either by legislative aid or otherwise, beyond what a fair interest for five or six years will make them; your committee are of opinion, that the most expedient plan as introductory to an *University*, will be to establish a *College* first: In that case, to make it respectable or indeed useful, it is respectfully suggested, that it will be necessary to place a President at the head of it, whose duty it shall be, besides exercising a general superintendency, to participate personally in giving instruction to the highest or first class in *College*, *Logic*, *Metaphysics*, *Moral Philosophy* and *Criticism*.—2d. A professor of *Mathematics* and *Natural Philosophy*.—3d. A professor of *Geography*, ancient and modern, and *astronomy*, as also, 4thly, a professor of the *Latin*, *Greek* and *Hebrew languages*, with one or more assistant tutors.

## XIX

But should the funds be auspiciously managed and augmented, then and in that case, your committee take the liberty, prospectively, of submitting it as their opinion, that a variety of other editions, to the merely literary departments should also be made.

Should it therefore, in a pecuniary point of view be found practicable, your committee would further respectfully suggest, the propriety of adding a professorship in *Theology*, with one of the law: together with a *Medical School*, to be conducted by its proper Professor.

In this department of the *University*, your committee beg leave to recommend the following arrangement: 1st. *Cuneal* proper; 2d, one on the *materia medica*, botany and natural history; 3d, one of chemistry; 4thly, one on physiology, anatomy and obstetrics, and 5thly, one of surgery.

The whole, both in the literary and other departments, forming a *Faculty*, and reciprocally aiding each other in preserving order, and giving dignity to the institution.

When the committee recommended these last variety of additions to the *College*, they are aware from their instructions, that a gratuitous education is intended by the legislature in the merely literary departments, and from the lowest of them in a common school, to the highest in an *University*.

In correspondence with this legislative intention, the committee have made their calculations for a term of years not exceeding six, when according to the estimates of the committee, the aggregate amount as will be seen from the tables, will be \$260.772, from this amount 60.772, may then safely be employed: Say 40,000 dollars of it in erecting a building, and the balance 20.772 dollars, in obtaining a *Library* and a *Philosophical and Chemical Apparatus*, in such proportions of each as may then be found most expedient.

After this deduction is made, it will be seen, that there will remain as a permanent fund of dolls. 200,000, the annual interest amount of which is dolls. 12,000, which, allowing the President dolls. 2,000 per annum, and to Professors, each, dolls. 1,200, and to the two tutors, each, dolls. 600.00. The whole amount of expenditures on the teachers will amount to \$3,800, leaving a balance yearly, of five thousand two hundred dollars, for appropriation in whatever way may be deemed best.

The committee submit it to the consideration of the legislature, whether it might not be advisable to appropriate an-

anually \$1,000 of the remaining \$5,200 to increase the library.

With regard to the internal police, in any of the public institutions, from the Academy to the University, your committee have thought it would be premature in them to suggest any thing on that subject.

All the laws and regulations customary and necessary in the different departments in the College or University, must naturally and with propriety grow out of the authority with which your honorable body may be pleased to clothe the board of trustees, and with the exception of the tutors, all the various grades of instruction of each of them.

Your committee having thus briefly stated the result of their deliberations upon the several subjects indirectly involved in the resolution of your honorable body, would respectfully inquire, whether the public good imperiously demands that a further report should be made at the present session, or whether a vacation might not consistently be allowed your committee, or some one of them, or some other person to prepare a bill so tedious in detail as the organization of the different schools.

Your committee have preserved the materials which will greatly facilitate the drafting such bill, and wish to hold themselves subject to the will of your honorable body, but they humbly conceive, that until the General Assembly devise the means of rendering school funds productive, a bill organising schools, academies and universities, cannot be material.

Your committee would further suggest to your honorable body, that they have opened a communication with the heads of department of those states, where schools have been organized by public authority, as also with some of the most respectable literary institutions in the United States; from which sources they expect to receive such documents as will greatly facilitate the accomplishment of so desirable an object.

Those documents, together with the time which will be allowed for reflection and study, in the opinion of your committee are important, and ought not to be dispensed with, unless existing cause, not within the knowledge of your committee, render a different course necessary.

All of which is respectfully submitted.

DANIEL J. CASWELL,

*Chairman of the Committee.*
